

Open Access

Menahem Dolinsky

Open Access – new concept ?

- Many publishers are active partner in a public/private partnership providing journals content to researchers in the **developing world**. Examples - Research4Life , HINARI, AGORA, OARE, aRDI.
- Many publishers support the important **public need** to access and use scientific and medical information. The public can directly access research through the Patient INFORM program - <http://www.patientinform.org> , where publishers and health organizations provide patients and their caregivers access to some of the most up-to-date research about specific diseases. Other public access programs include DeepDyve - <http://www.deepdyve.com> where publishers offers readers an option to rent articles for a small transaction fee.

Researcher Access

- Regular Access: Publisher publishes approximately X subscription journals and provides access to over Y million researchers. Publishers developed a number of licensing options, including the freedom and subject collections and pay per view. These give customers flexibility in the way they purchase access.
- Open Access Publishing: Publishers has an established Open Access program which includes Hybrid journals and Open Access titles.

Elsevier

Open Access Journals

Elsevier open archives

- Elsevier enables subscribers and the general public to have open access to archived material in 97 Elsevier journals. This includes all Cell Press articles after 12 months via the Cell Press website.
- Articles are made open access after an embargo period which begins from the final publication date of the article. The embargo periods are determined by the characteristics of the journal including subject area, usage patterns and frequency of publication.
- Articles featured in the archives are permanently free for everyone to read and download with permitted
- <http://www.elsevier.com/about/open-access/open-archives>

Elsevier green open access

- What is Green Open Access? This is the process of posting a free draft copy of your article to a repository or your website. Unlike the gold open access model, there are no fees for the author to pay under the green model of open access. Instead the publication costs are paid for by subscriptions, which enable readers to access the final published version of the journal article.
- Elsevier has a journal-specific posting policy which varies according to the version of the article to be posted, and when/how it is posted. Further details on permitted reuse can be found in our open access license policy.

Taylor and Francis

- Pure open access journals
- Hybrid open access journals
- Subscription journals
- Green open access
- Open access eBooks

- Taylor & Francis have been publishing academic research since 1798 and on an open access basis since 2006. We offer a broad range of author options, enabling authors to publish their material in quality open access journals with a high degree of peer review integrity.

TF Pure open access journals

- Taylor & Francis and Routledge currently publish a number of pure open access journals. All of the articles in these journals are published open access. The articles in these journals receive both rigorous peer-review and expedited online publication
- Gold open access - Authors publish open access via the gold open access route, in which the author or their funder pays an article publishing charge and the article is made freely available online upon publication.

Hybrid open access journals

- Hybrid open access journals with gold open access option – available for over 1,600 journals
- In addition to TF open access journals, you can also choose to publish in a subscription journal and pay a charge to make your article freely available online upon publication via our Open Select program. The majority of our journals offer this option - those that do have the Open Select logo on the journal's home page.
- Coevolution – 1000\$, Complex Metals – 1500\$, Economics & Finance Research – 1200\$

Green open access

- You can also choose to publish in a subscription journal and after an embargo period deposit the Author's Accepted Manuscript of your article to a disciplinary or institutional repository. Embargo periods are normally between 12 and 18 months, depending on the journal. Please see our full list of journals with applicable embargo periods.

Open access eBooks

- Taylor & Francis are pleased to be participating in the JISC and OAPEN-UK open access pilot project. Under the scheme, a selection of eBook titles have been made available as open access.
- What are the publication charges for Routledge Books Open Access monographs? £10,000 plus applicable taxes.
- <http://www.tandfebooks.com/page/openaccess>
- <http://www.oapen.org/home>

World Scientific Open Access

- All of World Scientific journals have the option of Open Access in accordance with the Creative Commons Attribution licenses. WS currently publishes more than 120 journals offering 'Gold' publishing options in either dedicated Open Access or hybrid journals where there is a mixture of Open Access and subscription-based articles.
- The Article-Processing Charge (APC) of Open Access is \$1500 but can vary across journals.
- <http://www.worldscientific.com/page/open#open-access-option>

World Scientific's Policy on Self Archiving & Green Open Access

- Authors can make the preprints of their research papers anywhere at any time. Authors can also post the accepted author manuscripts of their research papers freely available at the end of an embargo period of 12-24 months following official publication or later, by placing them on personal websites, subject or institutional repositories or as stipulated by the Funding Agency. The embargo period can vary between sciences and Funding Agency Requirement.

De Gruyter Open Access Policy

- De Gruyter has a strong commitment to support societies, editors and authors who wish to make their publications available in open access. Authors are offered a choice of models, including both author-pays models and self-archiving options on institutional repositories. Different solutions apply to journals articles and books.
- De Gruyter also cooperates closely with Funding Agents to support authors in fulfilling the requirements of these bodies.

DEG Publication of OA articles

- Gold – immediate OA distribution over the publisher's website. Authors or funding agencies are required to pay an access processing fee of 1,750 Euro.
- Green – self-archiving on institutional repositories: authors are free to put their contributions OA on their institutional repositories twelve months after publication.
- Foundation of new OA journals: De Gruyter offers attractive business models for society-owned or author-pays journals. Editorial staff will be pleased to discuss your project proposal.

DEG Publication of OA Books

- OA monographs: Immediate OA distribution over the publisher's website: De Gruyter's Open Access Book Pricing model is based on number of pages, with discounts applying to larger title packages. Titles are simultaneously published in print, and authors receive a royalty kick-back on net revenues
- OA book chapters in anthologies: The same options (gold or green OA) apply as for journal articles

Challenges and dilemmas

- Archival rights
- A free meal you say ? There are no free meals !
- Self-archiving / Green open access – copyright infringements
